Are you in the US Use the Comment button to reply. Thanks for using Fixya. Login to post It runs on 6 AA batteries. Heres a link to the manual. Instructions are on page 13. And have it mailed in the mail It will bring you to a direct download page, which will then download the manual for the CTK551 Keyboard. Link If you are referring to CT615, you can purchase a PDF copy of manual from ebay Some CASIO CTK5000 models require inverse voltage polarity than most of others adapters have!!! RISK OF BURNING OUT ELECTRONICS!!!There are 2 ways of connecting the keyboard to your PC.Using the MIDI outputs and a special MIDI to gameport adapter if you have a very old system and have a joystick port Dsub shape on your soundcard or PC, then you use that cable. Of course this is legacy and stopped existing in newer computers, now USB is used. Only the professional line of soundcards have direct MIDI inputs. For most of us, with consumer soundcards and PCs, there are no MIDI inputs. The good news is that newer keyboards support USB MIDI and features direct USB connection so all you have to do is install the drivers that are provided with your keyboard, usually a CD, and follow the instruction to install the USB drivers for your casio keyboard, BEFORE you plug in the cable very important! once installed you reboot and connect your keyboard using a USB cable Now if your keyboard is older and has MIDI outputs, like mine for example, you will need to

purchase a MIDI to USB adapter, those have MIDI cables in one end that plug to your keyboard and the other end a USB connector. Agree to terms. Select your keyboard from the list and download the manual. <http://gmtshipping.com/attachment/bunn-cwtf20-aps-manual.xml>

And it shows that the tempo is 159, normally its 90 I contacted the customer service but all they told me to do was turn off the keyboard unplug it, plug it back in and turn it on to reset but that didnt work.
